Gojjam Betresidiq Scholarship (GBS) has two central objectives:

- To provide financial and moral support to highly promising but economically underprivileged students in preparatory schools (grades 11 and 12); and
- To promote gender equality in economic access to education by providing set-asides for girls.

The target population of the program is that group of highly motivated preparatory school students who for lack of modest financial and moral support is at high risk of dropping out of school. These kids are often the first in their extended families to go beyond elementary education.

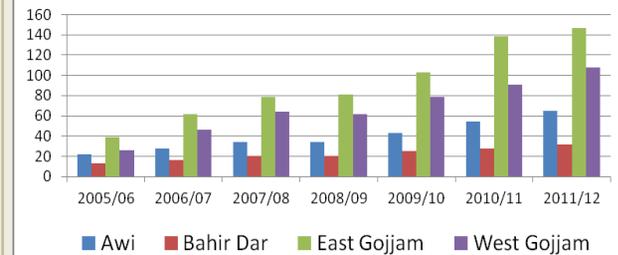

Coverage

The program covers preparatory schools within the four administrative zones of the former province of Gojjam. The number of schools covered grew from 8 in 2005/06 at the beginning to 35 in the 2011/12 academic year. In the current system these are schools whose sole purpose is to prepare students for higher education. And hence the secondary objective of the program is to increase the number of college admissions from underprivileged families in the project area.

Beneficiaries are selected by committees established at each general secondary school (grades 9 and 10). In the 2011/122 academic year there were some 62 such schools. Qualification for the scholarship is primarily need followed by academic performance.

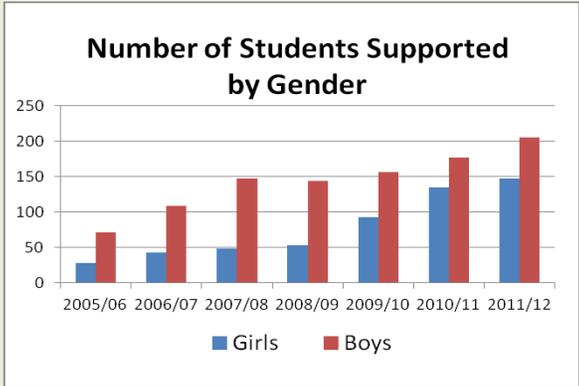

The program started with 100 students (53 in grade 11 and 47 in grade 12) in academic year 2005/06. In academic year 2011/12 there were 355 beneficiaries. In the current academic year the number of students supported has further grown to 389. Over the first seven years of the program both the number of schools covered more and the number of beneficiaries essentially quadrupled. And so far, including the current batch of beneficiaries, about **1140** needy but very promising students have been assisted. As each student supported receives assistance for two years, the total number of scholarships granted over the life of the program will reach **1,750** in the current academic year of 2012/13.

Number of Students Supported by Zone

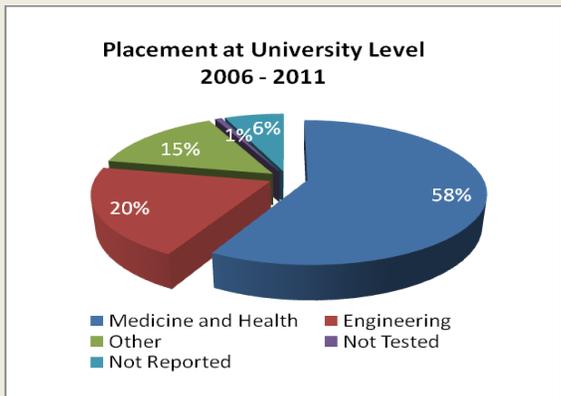

Gender Equality

The program recognizes the cultural and economic hardships girls face in Ethiopia. It recognizes equally as well the positive impact of girls' education on poverty alleviation and improvement of economic condition of future generations. And thus, set-asides for girls, in addition to scholarship they win competitively, grew from 25% in 2005/06 to 40% in 2010/11. Over the life of the program scholarships granted to girls was 34% of the total.

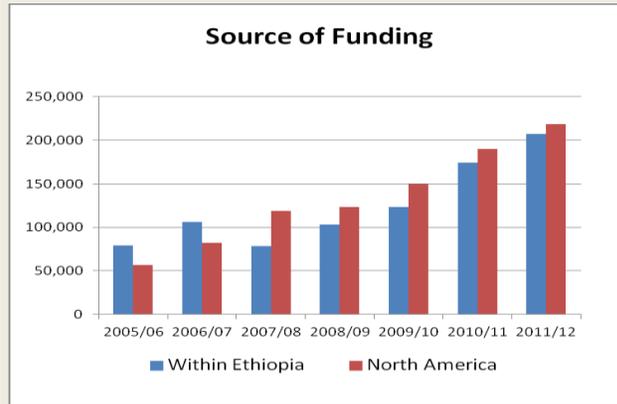

Fields of Study

The program is proud of its record of achievement. Virtually all beneficiaries of the program are college bound. So far only 4 students failed to take the final exam due to health reasons, and only 2 failed to qualify for admission to a university. The rest, about 700, of our graduates, were admitted to college. An impressive majority of them join the most competitive and highly desired fields of study: medicine and engineering. In the last cohort of graduates, 53% and 31% joined medicine and engineering respectively. Over the life of the program 58% ended up in medicine and health, while 20% chose to do engineering.

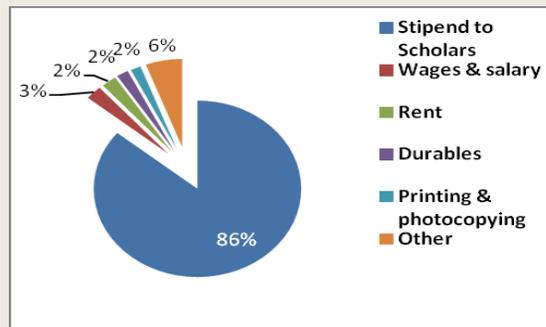

Sources of Funds

Unlike most scholarship programs of this nature GBS is reliant on domestic sources of funds. Our compatriots in country bear nearly half the cost of the program. Participation is wide. Over the life of the program hundreds of donors in Ethiopia and in the Diaspora have extended their generosity to this noble cause.

Use of Funds

Your contributions are managed conservatively - in fact too conservatively. 86% of funds collected goes to stipend of beneficiaries; 3% for salaries, and about 11% for all other expenses of the program.

New Initiatives

A. Hiring of Full-time Program Coordinator

The fast expansion of the program largely due to the rapid increase in the number of secondary and preparatory schools in the project area; the equally rapid increase in the number of universities in the country to which our students are assigned; and the need to monitor and follow-up on our college students and those currently in professional service has compelled us to hire a fulltime program coordinator. The coordinator joined the program in July 2013 and is expected to be in charge of the overall management of the program, public relations and fund raising in Ethiopia.

B. Assistance to College Students

While college students are provided with room and board they receive no assistance to cover their other needs such as clothing, transport, health, personal supplies, books and stationery, etc. Many choose to opt for training programs of shorter duration even though they qualify for more rigorous and longer term programs such as medicine and engineering. This academic year GBS initiated a pilot project of providing financial assistance to 37 the most needy students in Addis Ababa and Debre Markos Universities. This program will be closely monitored to see the level of impact of modest financial aid on the quality of life and academic performance of those in the experiment.

C. Fundraising in the Washington DC Area

Late January of 2012 a modest fundraising event was held in Arlington, Virginia. The event had three basic goals: raise money; introduce the program to Ethiopians in the DC-Metro area; and build a team of volunteers and supporters. The event was a success in all three areas. Participation from the public, donations of food and drinks from local restaurants and Ethiopian groceries, and cooperation from local artists was beyond the organizers' expectations. GBS is very grateful for the generosity of its supporters and volunteers.

LIFE in Academic Year 2011/12

One of the most important contributors to the success of this program right from its initiation is our Canadian chapter which is now known as Low Income Families in Ethiopia Scholarship (LIFE). Having formed a partnership with a Canadian Non-Profit organization, DevExchange, which has interest and experience in economic development projects in Ethiopia, LIFE has undertaken relatively innovative and successful fundraising activities to support GBS. In addition to the scholarship program, LIFE collected and shipped a crate full of books to Ethiopia about two years ago. It is still engaged in raising funds for books for schools and universities in the project area.

LIFE would like you to join its noble mission. For \$200 a year you can change the life of one underprivileged student and his/her entire extended family. Think about it, with an investment of less than 55 cents a day you can keep one young promising person in school and insure his/her march to a rewarding professional life. Yes, your contribution will make a difference not only in the life of the recipient, but in his/her extended family and the community at large. This is so since it has been proven over and over that education is (1) the most sustainable form of investment for economic development, and (2) it has the largest multiplier effect. Thus, with your donation of \$200 a year you can help turn despair into hope, and generational poverty into prosperity.

Please make your donation of **\$200.00** per scholarship or more to:
